

MODULE 11

Working from Pakistan & the Full Simulation

**Set up a desk that never fails,
then run a full week with three trucks.**

Time zones and daylight saving, a resilient home setup, getting paid and taxes in Pakistan, a healthy night-shift routine, finding your first carrier, and a five-day simulation with eight role-plays scored by Claude, a weekly report, a capstone and your final checklist.

How to use this module

This is the last handbook. The first half prepares **you**: your hours, your desk, your pay, your health and your first carrier. The second half tests **everything**: a five-day simulation with three trucks, where Claude plays the brokers, the driver and the carrier.

Study rhythm (about 8 hours)

- **Session 1 (1.5 h)**: time zones, setup, pay and tax, routine, first carrier.
- **Sessions 2–6 (1 h each)**: one simulation day each, with that day's role-plays.
- **Session 7 (1.5 h)**: weekly report, capstone, final checklist.

How the role-plays work

1. Read the day card and prepare your numbers.
2. Copy the start line from page 13 into the chat with Claude.
3. Talk (type or use voice) as you would on a real call.
4. Claude stays in character until the call ends, then scores you with the rubric (page 14) and shows a better version.
5. Repeat any role-play scoring below 7/10.

Contents

L11.1 Working from Pakistan	4
L11.2 The simulation week	9
L11.3 Capstone and final checklist	16
Your next 30 days · Sources	18
Certificate of completion	20

Treat it like a real week

Keep a load tracker, write handover notes, save "documents" in folders, and log every call. The habits are the real test.

Not tax or legal advice

Pakistan tax and banking rules in Lesson 11.1 are as reported in 2026. Confirm with a qualified adviser and your bank before you start work.

11

MODULE 11 · REMOTE AND READY

**The truck is 12,000 km away.
Your reliability has to be local.**

Carriers hire remote dispatchers for night-time coverage, sharp numbers and clean paperwork, and they fire them for missed calls, wrong time zones and silence during outages. This module makes sure your setup is as professional as your skills.

Your clock and theirs

Your clock and theirs

Hours to add to U.S. time to get Pakistan time (PKT). The same table works in reverse: subtract to go from PKT to U.S. time.

U.S. zone	Add in U.S. summer 8 Mar – 1 Nov 2026	Add in U.S. winter from 1 Nov 2026	Summer example	Winter example
Eastern (ET) New York, Atlanta, Charlotte	+9 h	+10 h	8 AM ET = 5 PM PKT	8 AM ET = 6 PM PKT
Central (CT) Chicago, Dallas, Memphis	+10 h	+11 h	8 AM CT = 6 PM PKT	8 AM CT = 7 PM PKT
Mountain (MT) Denver (Arizona stays on MST: +12)	+11 h	+12 h	8 AM MT = 7 PM PKT	8 AM MT = 8 PM PKT
Pacific (PT) Los Angeles, Seattle	+12 h	+13 h	8 AM PT = 8 PM PKT	8 AM PT = 9 PM PKT

Pakistan doesn't change its clocks (PKT = UTC+5 all year). The U.S. does, twice a year: your shift moves one hour later in November and one hour earlier in March. Next change: **1 Nov 2026**, then **14 Mar 2027**.

Typical night shift: about 5 or 6 PM to 3 or 4 AM PKT covers the U.S. Eastern and Central business day, when most loads are posted and booked.

Always write the zone after a time: 1 PM ET, 9 AM CT, 7 PM PKT. The single most common remote-dispatch error is a wrong time zone.

Practice conversions

U.S. time (date)	PKT
Wed 14 Oct, 9 AM CT	Wed 7 PM
Thu 15 Oct, 1 PM ET	Thu 10 PM
Mon 2 Nov, 9 AM CT (after the change)	Mon 8 PM
Tue 3 Nov, 4 PM PT	Wed 5 AM

Why the date matters

Late U.S. afternoons are already **tomorrow** in Pakistan. When you write notes, use the U.S. date and time for loads (that's what brokers and drivers use) and add PKT only for your own schedule.

Set two clocks

Put U.S. Eastern and Central clocks on your phone and computer next to PKT. Most load boards and tracking apps can also show times in the facility's zone.

A desk that doesn't fail

A remote dispatch desk that doesn't fail at 2 AM

Six parts of a reliable setup in Pakistan. Most cost little; all prevent missed calls and lost loads.

Power

- ✓ UPS for router, laptop and phone (at least 2–3 hours)
- ✓ Solar or generator backup if load-shedding is long
- ✓ Charged power bank for the phone

Internet

- ✓ Main fibre or broadband line
- ✓ Backup from a different provider (4G/5G device)
- ✓ Test speed and call quality before each shift

Phone & voice

- ✓ The carrier's U.S. business number on a softphone app
- ✓ Noise-cancelling headset with a good microphone
- ✓ Quiet room; no fans or traffic behind you

Computer & tools

- ✓ Laptop with a second screen
- ✓ Load board seat, email, TMS or sheets set up by the carrier
- ✓ Maps, weather, EIA diesel, FMCSA sites bookmarked

Security

- ✓ Multi-factor authentication on every account
- ✓ Password manager; never share logins
- ✓ Separate work browser profile; screen lock when away

Records

- ✓ Carrier's shared drive, one folder per load
- ✓ Load tracker, invoice tracker, broker list
- ✓ Handover note at the end of every shift

Plan for the outage before it happens. Agree with the carrier what happens if your power or internet fails: who covers the phones, how you'll tell them, and where the current load status is written (the handover note).

Start-of-shift checklist (10 minutes)

1. Power and backup internet working; headset tested.
2. Read the handover note; check every truck's status.
3. EIA diesel (Mondays); any weather alerts on active lanes.
4. Load board, email, tracking and chat groups open.
5. Message the carrier: "Online and covering. Status: ..."

Use the carrier's number, not your own

Brokers call back the numbers on the carrier's FMCSA record and setup packet. Use the carrier's U.S. business line (usually a softphone app); never give out a personal Pakistani number for business calls.

If your connection drops mid-call

Call back immediately from the backup: **"Sorry, I lost the line. This is Jawad from Blue Line again, about load PF-20931."** Then tell the carrier if the outage continues.

Getting paid and staying legal

Getting paid in Pakistan

The usual path from a U.S. carrier to your account. Not tax or legal advice; check current rules before you start.

Tax (as reported, June 2026): freelancers' foreign remittances fall under a final tax regime: **0.25%** for those registered with the Pakistan Software Export Board (PSEB), and **1%** for unregistered freelancers. Whether dispatch services qualify for PSEB registration is a question for a Pakistani tax adviser.

Keeping dollars (as reported, 2026): exporters' special foreign-currency accounts let freelancers keep part of their proceeds in foreign currency, and SBP simplified Form R reporting in April 2026. Rules change: confirm with your bank.

Paid only by the carrier. Never accept money from brokers or shippers (Module 8). Invoice the carrier weekly with a list of loads and your agreed fee.

How carriers usually pay dispatchers

Model	How it works
Percentage	A share of gross revenue (industry guides: often 5–10%; Module 7)
Weekly flat fee	Fixed amount per truck or per week
Salary / hourly	Employed or contracted by a dispatch company

Whatever the model, it must be written in your dispatch agreement, and paid by the carrier only.

Your weekly invoice to the carrier

Week dates · list of loads (load #, lane, gross) · fee calculation · total · payment details. Keep copies with the bank credit advice for tax filing.

Keep your own records

Agreement, invoices, bank advices and tax filings, stored safely. They prove your income source if your bank or FBR asks.

A night-shift routine you can keep

A sustainable night-shift day (PKT)

Example schedule in U.S. summer time. After 1 Nov 2026, shift everything one hour later.

Five habits of long-lasting night dispatchers

- Fixed sleep and wake times, seven days a week if possible.
- Light exercise and daylight before the shift.
- Water and real meals; limit caffeine in the last four hours of the shift.
- Short breaks every 90 minutes: stand, stretch, rest your eyes.
- A clear stop: handover note sent, laptop closed.

Coverage agreements

Agree in writing which hours you cover, who covers weekends and holidays, and how emergencies reach someone while you sleep.

Pakistan realities

Plan around load-shedding schedules, Ramadan timings, and family events. Tell the carrier early about any day you can’t cover, just as you’d want to hear early about a late truck.

From trainee to working dispatcher

From trainee to your first carrier

A realistic path, and the offers to refuse.

Walk away if someone asks you to...	Why
Pay for a "guaranteed job" or leads	Real employers pay you
"Rent" an MC or run loads under someone's authority	Identity misuse and unauthorized operation
Use a shared or borrowed load-board login	Against board rules; seat must be yours
Collect broker payments into your account	Money must go to the carrier or its factor
Pretend to be the U.S. owner	Misrepresentation; destroys trust (Module 8)

Zero-investment model (Module 0): you shouldn't need to buy authority, trucks or leads. The carrier provides the seat and tools; you provide skill, reliability and night-time coverage.

Your pitch: "I cover your U.S. business day from Pakistan, book to your minimums, vet every broker, and send you clean paperwork the same day."

What your dispatch agreement should cover (Module 1)

Clause	Why it matters
Services and hours	What you do (search, book, track, paperwork) and when you are on duty
Authority	What you may book or sign without asking; the minimum rates
Fee and payment	Amount, schedule, method; paid only by the carrier
No brokering	You never assign loads to other carriers or collect freight payments
Data and accounts	The seat and accounts belong to the carrier; confidentiality; returning data if you part ways
Ending the agreement	Notice period; handover of open loads and documents

Meet the simulation fleet

Simulation fleet: Blue Line Transport, three trucks

Practice carrier, drivers and lanes for the final week. Map drawn for this course.

Truck 12 • Carlos

53' dry van • no air-ride • 44,500 lb
Home: Joliet • Wants: Southeast and back to the Midwest

Truck 7 • Maria

53' reefer • 43,000 lb • FSMA-trained
Home: Dallas • Wants: Texas → Midwest produce and grocery

Truck 3 • Dwayne

53' dry van • 44,000 lb • home every weekend
Home: Atlanta • Wants: Southeast regional, home by Friday

Blue Line rules (practice): break-even \$2.59 / target \$2.70 per total mile for vans, \$2.80 / \$2.95 for the reefer • you may book at or above target; below target, ask Mike • no hazmat • Dwayne home Friday night.

Monday evening (your shift start): positions and limits

Truck	Status	Empty / available	Hours	Limits
12 • Carlos	Delivered in Joliet today	Joliet, IL • Tue 7:00 AM CT	Full daily clocks • 52 h left on 70	No air-ride • 44,500 lb
7 • Maria	Delivering in Dallas Tue AM	Dallas, TX • Tue 10:00 AM CT	Full daily • 45 h left	Reefer • 43,000 lb • FSMA training
3 • Dwayne	Home weekend done	Atlanta, GA • Tue 8:00 AM ET	Full • 60 h left	Home Fri by 6 PM ET

The week at a glance

The simulation week

Five days, three trucks, eight role-plays. Everything from Modules 0–10 in one practice week.

MON	TUE	WED	THU	FRI
Plan - Positions, hours and home time for all three trucks - Diesel check, update break-even - Search next-day loads; post trucks	Book - Screen boards; vet brokers - Negotiate 3 loads (role-plays A, B) - Check rate cons; dispatch sheets	Execute - Pickups, BOL checks, check calls - Detention at a receiver (role-play F) - Driver morning call (role-play C)	Problems - Truck 7 late: closure on I-44 (role-play E) - Suspicious broker calls (role-play G) - Rate con error to fix (role-play D)	Close - PODs, invoices, lumper receipt - Dwayne home; weekend plan - Weekly review with Mike (role-play H)

How to run it: one day per study session. Read the day card, do the written tasks, then run that day's role-plays with Claude. Keep your load tracker and handover notes as if it were real.

Pass mark: 7/10 or better on every role-play, all paperwork correct, and a weekly report Mike could act on.

Monday tasks (written)

- 1) Update diesel and break-evens. 2) Write each truck's plan for Tue–Fri in two lines. 3) Post all three trucks. 4) Send Mike a short Monday plan.

Your Monday message to Mike (example)

"Good evening Mike. Plan: 12 heads Southeast from Joliet Tue, 7 reloads produce Dallas–Chicago, 3 runs short Southeast loads and is home Friday. Diesel \$6.38, break-even \$2.59 vans / \$2.80 reefer. Posting all three now."

Daily simulation log (copy for each day)

Truck	Status at shift start	Actions this shift	Role-plays · scores	Handover / next step
12				
7				
3				

Day 2: book the fleet

Six practice loads are on the board for your three trucks. For each, work out **rate per total mile**, compare with the truck's break-even and target, check the broker, and decide. Then run **role-play A** (negotiate load c or d) and **role-play B** (a broker calls about Truck 3).

#	Truck	Lane	Loaded + DH	Details	Posted	Broker	Per total mi · decision
a	12	Joliet, IL → Nashville, TN	470+15	Dry van · 41,000 lb · Tue 1 PM CT · deliver Wed AM	\$1,300	Riverbend Logistics · CS 93 · DTP 29	
b	12	Chicago, IL → Atlanta, GA	715+40	Dry van · 39,000 lb · Tue 11 AM CT · deliver Wed 3 PM ET	\$2,050	Magnolia Freight · CS 95 · DTP 27	
c	7	Dallas, TX → Chicago, IL	925+20	Reefer 36°F · produce · 40,000 lb · Tue 2 PM CT · deliver Thu 2 PM CT	\$2,850	Lone Star Cold Chain · CS 90 · DTP 31	
d	7	Dallas, TX → Memphis, TN	450+10	Reefer 34°F · dairy · 38,000 lb · Tue 1 PM CT	\$1,250	Delta Route Logistics · CS 90 · DTP 31	
e	3	Atlanta, GA → Charlotte, NC	245+20	Dry van · 30,000 lb · Tue 10 AM ET · deliver Tue 4 PM ET	\$850	Peachtree Freight · CS 92 · DTP 33	
f	3	Atlanta, GA → Nashville, TN	250+15	Dry van · 35,000 lb · Tue 1 PM ET · deliver Wed 8 AM CT	\$780	New broker (3 weeks) · no score	

Your Tuesday checklist

Vet every new broker (Module 8) · check each rate con against your call (Module 9) · dispatch sheets with time zones · tracker updated · post any truck still empty.

Remember the limits

Truck 3 must be home Friday by 6 PM ET. Truck 7's reefer loads need a precooled trailer and the right setpoint on the BOL (Module 2). Truck 12: 44,500 lb max, no air-ride.

Model answers are on page 15. All companies are fictional.

Days 3–5: execute, fix, close

Day	Event	Your task · role-play
Wed	Carlos calls at 6:30 AM CT: 11 h of driving left, worried about parking near the Atlanta receiver	Role-play C (you're Jawad, Claude is Carlos)
Wed	Truck 3 has waited 3 hours at a receiver on its Wednesday reload out of Charlotte; broker says "no detention on this one"	Role-play F · detention notice and invoice line
Wed	Maria sends the BOL: setpoint 36°F continuous, 20 pallets, seal 88412	Check against the rate con; update broker
Thu	Truck 7 stuck behind an I-44 closure near Joplin, MO; delivery appointment at risk	Role-play E (drill 12) · problem log
Thu	A "broker" offers Truck 3 a Friday load at \$3.40 a mile: new MC, gmail, "book in 5 minutes"	Role-play G · six-step response (Module 8)
Thu	Truck 12's next rate con shows \$1,950 instead of the \$2,050 agreed, and no detention	Role-play D · correction email
Fri	PODs from all trucks; one lump sum receipt (\$185) from Truck 7 in Chicago	Invoices, folders, invoice tracker
Fri	Dwayne home by 6 PM ET; Truck 12 and 7 weekend plans	Weekend handover note
Fri	Weekly review call with Mike	Role-play H · weekly report (page 15)

Thursday is the real test

Three problems in one shift. Prioritize: **safety and hard deadlines first** (Truck 7's appointment), then **fraud** (don't let Truck 3 book a trap), then **money** (the rate con fix, before anyone signs).

Write the handover

At the end of each simulated shift, write a handover note (Module 9 template). Claude can review it: paste it and ask, "What's missing?"

Eight role-plays

Eight role-plays to run with Claude

Copy the dark line into the chat to start. Claude stays in character, then scores you and explains what to improve.

A Broker - posted load

Truck 7 reefer, Dallas → Chicago produce. You call on a posted load and negotiate.

Role-play A. You are the broker. Medium difficulty. Score me with the rubric.

B Broker calls you

A broker calls about Truck 3's posting in Atlanta with a short regional load.

Role-play B. You are the broker. Medium difficulty. Score me with the rubric.

C Driver morning call

Carlos: hours left, pickup window, directions, a concern about parking.

Role-play C. You are the driver (Carlos). Medium difficulty. Score me with the rubric.

D Rate con correction

The rate con for Truck 12 shows the wrong rate and no detention.

Role-play D. You are the broker. Medium difficulty. Score me with the rubric.

E Late ETA

Truck 7 is stuck behind an I-44 closure; appointment at risk.

Role-play E. You are the broker. Medium difficulty. Score me with the rubric.

F Detention

Truck 3 has waited 3 hours at a receiver; broker says "no detention".

Role-play F. You are the broker. Medium difficulty. Score me with the rubric.

G Suspicious broker

A "broker" with a great rate, a new MC and a gmail address.

Role-play G. You are the broker. Medium difficulty. Score me with the rubric.

H Weekly review with Mike

Explain the week: revenue, rate per mile, deadhead, problems, next week.

Role-play H. You are the carrier (Mike). Medium difficulty. Score me with the rubric.

Make the role-plays harder over time

Level	What Claude does
Easy	Friendly, gives information when asked
Medium	Realistic pushback, some missing details
Hard	Fast talker, lowball offers, pressure, hidden problems

Useful follow-up prompts

"Replay that call as a 10/10 dispatcher." ·
 "What three phrases should I practise?" ·
 "Give me the same role-play with a different lane." · "Test my time-zone math."

Voice practice

If your Claude app supports voice, use it: speaking under time pressure is the skill brokers notice first. Otherwise type exactly what you would say.

The rubric

The role-play scoring rubric

Claude uses this after every role-play. Use it yourself when you practise with a friend or record yourself.

Criterion	What "2" looks like	0	1	2	Review
Opening	Name, company, MC, reference; purpose in 15 seconds	missing	partly	fully	drill 8
Facts	Asks and confirms the right details before money or decisions	missing	partly	fully	Modules 2–4, 9
Numbers	Uses break-even, target, market; math correct; totals all-in	missing	partly	fully	Module 7
Judgement	Safety, legality, fraud checks, carrier-side decisions	missing	partly	fully	Modules 4, 8, 10
Close	Clear next step, confirms in writing, polite either way	missing	partly	fully	Modules 8–9

Scoring: 5 criteria × 0–2 points = 10. **7+** pass · **9–10** ready for real calls · below 7: review the linked module and repeat the role-play.

Automatic fail: booking below the carrier's minimum without asking, pushing a driver past his hours, or ignoring two fraud red flags. Safety and honesty come before score.

Ask Claude for a replay: "Show me what a 10/10 version of my call would sound like," then try again.

Your score sheet

Role-play	A	B	C	D	E	F	G	H
Attempt 1								
Attempt 2								
Best (≥ 7 to pass)								

What Claude's feedback looks like (example)

Role-play A · 7/10. Opening 2 · Facts 2 · Numbers 1 (you quoted \$3.08 a mile on loaded miles; on total miles it is \$3.02) · Judgement 1 (you didn't ask about the precool or setpoint) · Close 1 (you didn't confirm detention terms). **Try again with:** "For 945 total miles with a same-day reefer pickup, I need \$2,950."

Honest scoring helps you

Ask Claude to be strict. A 7 that shows you exactly what to fix is worth more than a flattering 10. Repeat each role-play until you score 9+ at medium difficulty.

The weekly report

The weekly report to the carrier

Friday of the simulation week (practice numbers). Numbers first, then three sentences of meaning.

Revenue \$14,750	Loads 8	Rate per total mile \$2.64	Deadhead 10.4%	Detention billed / paid \$275 / \$125	Invoices open 4 • \$9,850
----------------------------	-------------------	--------------------------------------	--------------------------	---	-------------------------------------

Truck	Loads	Revenue	Total mi	Rate per total mile	Deadhead
Truck 12 • Carlos	3	\$4,750	1,810	 \$2.62	9.4%
Truck 7 • Maria	2	\$5,900	2,050	 \$2.88	8.3%
Truck 3 • Dwayne	3	\$4,100	1,720	 \$2.38 below break-even	14.0%

Three lines for Mike: (1) The fleet averaged \$2.64 a mile with 10.4% deadhead. (2) Truck 3 ran \$2.38, below break-even, because of short regional loads and a 240-mile empty return. (3) Next week: book Truck 3 on longer Friday loads toward Atlanta and chase the \$150 of unpaid detention.

Practice numbers. Your real report uses the carrier's actual loads and its own break-even.

Model answers: Tuesday board

#	Per total mi	Decision
a	\$2.68	Good backup; just under \$2.70 target
b	\$2.72	BOOK Truck 12: above target, Southeast
c	\$3.02	BOOK Truck 7: above \$2.95, Midwest
d	\$2.72	PASS reefer: under \$2.80 break-even
e	\$3.21	BOOK Truck 3: short, same-day, reload Charlotte
f	\$2.94	CAUTION new broker, no score: vet first

Write your three lines

Using your own simulation week (or the numbers above), write three sentences for Mike: the fleet result, the problem truck and why, and one concrete change for next week.

Role-play H opener

"Mike, quick weekly review. We ran 8 loads for \$14,750, averaging \$2.64 a mile with 10% deadhead. Truck 3 is the one to fix..."

The capstone: one message, every skill

WHATSAPP · MIKE (BLUE LINE) · MON 5:30 PM PKT (7:30 AM CT)

“Jawad, Truck 12 empties in **Memphis tomorrow 8 AM CT**. Carlos has **38 hours** left on his 70 and has to be **home in Joliet by Saturday night**. Find something paying toward Chicago. Also, **Harbor Point** wants our packet for a load next week, but I heard something about their bond. And diesel jumped to **\$6.70** this week. Is our \$2.70 minimum still OK? Let me know tonight.”

Your tasks

1. **Numbers (Module 7):** recalculate Truck 12's break-even and target at \$6.70 diesel (\$1,300 fixed, 2,500 mi/week, \$0.86 other variable, 6.5 mpg, 9% fees).
2. **Search (Module 6):** write the search: origin, DH-O, destination, equipment, weight, date.
3. **Feasibility (Modules 3–4):** can Carlos deliver and still be home by Saturday within 38 hours?
4. **Choose (Modules 6–7):** compare the three loads below.
5. **Vetting (Module 8):** what do you do about Harbor Point?
6. **Communicate (all):** write your reply to Mike, and make the first call to the broker (drill 8).

#	Lane	Loaded + DH	Details	Posted	Broker
L1	Memphis, TN → Chicago, IL	530 + 10	Dry van · 42,000 lb · Tue 10 AM CT · deliver Wed 8 AM CT	\$1,550	CS 94 · DTP 30 · 9 yrs
L2	Memphis, TN → Indianapolis, IN	465 + 25	Dry van · 40,000 lb · Tue 9 AM CT · deliver Wed 7 AM ET	\$1,300	CS 91 · DTP 34
L3	West Memphis, AR → Joliet, IL	540 + 12	Dry van · 44,000 lb · Tue 11 AM CT · deliver Wed 10 AM CT	\$1,450	CS 88 · DTP 38

Model answer on page 19. When you're done, ask Claude: "Capstone review. Here is my answer: ..." for a scored review.

Capstone scoring (10 points)

Part	Points	Full marks when...
Numbers	3	Break-even and target correct to the cent, with working
Search + feasibility	2	Sensible search; hours and home time checked
Load choice	2	Rate per total mile for all three; clear decision and backup
Vetting	1	Checks L&I, holds the packet, uses the setup platform
Communication	2	Reply to Mike is short, numeric and ends with a question; drill 8 opening correct

Ready for a real seat?

Tick each line only when you can do it **without notes, under time pressure**. Anything unticked: revisit that module and repeat its drill or practice.

Module	I can...	✓
0-1	Explain the carrier-side dispatcher role, ethics and the dispatch agreement; phonetic alphabet and read-backs	☐
2	Match equipment to freight: dimensions, weights, codes (V, R, F, VA, VM, VC...)	☐
3	Place any city on the map, name its corridor and zone, convert time zones	☐
4	Check HOS feasibility for any load; never pressure a driver	☐
5	Verify a carrier's authority, insurance and packet; complete a broker setup	☐
6	Build a search, screen a board in minutes, read broker signals	☐
7	Calculate cost per mile, break-even, target, rate per total mile and per day	☐
8	Vet a broker in seven checks; spot fraud; negotiate with a reasoned anchor	☐
9	Check a rate con, dispatch the driver, check BOL/POD, invoice the same day	☐
10	Prove accessorials, handle delays, breakdowns and accidents, support a claim	☐
11	Run a reliable remote shift; pass all eight role-plays; write the weekly report	☐

Readiness test

All eleven lines ticked · all role-plays ≥ 7/10 (at least four at 9+) · capstone answered with correct numbers · one full simulated week of handover notes.

Keep learning on the job

Rates, rules and tools change. Keep your source habits: FMCSA, DAT/Truckstop help centres, EIA diesel, the carrier's own numbers, and your load economics cards.

Your course, and your next 30 days

Your course, end to end

Eleven handbooks, one practice carrier, twelve speaking drills. Use this map to review before your first real shift.

MODULE 0-1 Foundations Industry, roles, carrier-side dispatch, drills 1-3	MODULE 2 Equipment Trailers, specs, codes, weights	MODULE 3 Geography & time Regions, corridors, zones, time	MODULE 4 HOS & feasibility Clocks, ELDs, can we make it?	MODULE 5 Onboarding & documents MC, insurance, packets, setup	MODULE 6 Load boards Search, screen, broker signals
MODULE 7 Load economics Cost per mile, break-even, lanes	MODULE 8 Vetting & negotiation Fraud, bond rule, scripts	MODULE 9 Execution & paperwork Rate con → POD → paid	MODULE 10 Problems & claims Accessorials, delays, claims	MODULE 11 Pakistan & simulation Remote setup, full week, role-plays	NEXT Role-plays with Claude, then a trial week with a real carrier.

A 30-day plan

When	What
Week 1	Review Modules 0-5 with the course map; redo drills 1-7 aloud daily; run role-plays C and D.
Week 2	Review Modules 6-10; one full simulation day per evening; role-plays A, B, E, F, G at medium difficulty.
Week 3	Hard-difficulty role-plays; capstone; build your “proof pack”: two practice load folders, your best role-play transcripts, a sample weekly report.
Week 4	Set up your desk (power, internet, headset, security); approach carriers or dispatch companies; ask for a paid trial week.

Your 20-second introduction to a carrier

“I’m Jawad, a trained carrier-side dispatcher working from Pakistan. I cover your U.S. business day, book to your minimums, vet every broker, and send clean paperwork the same day. Can I show you a sample week?”

Stay on the right side

No paid “job guarantees”, no renting authority, no shared logins, no broker money in your account. Your reputation is your career.

Capstone model answer

- 1 Fuel $\$6.70 \div 6.5 = \1.03 . Cost = $0.52 + 1.03 + 0.86 = \$2.41$. Break-even = $2.41 \div 0.91 = \mathbf{\$2.65}$. Target = $(2.41 + 0.10) \div 0.91 = \mathbf{\$2.76}$. The \$2.70 minimum is now only 5¢ above break-even.
- 2 Origin Memphis, DH-O 50 · destination Chicago area or zone covering IL (Z6) · dry van, full, 53 ft · 44,500 lb · pickup Tue.
- 3 L1: ~540 mi ≈ 11 h driving + loading/unloading ≈ 14 h on duty: fits 38 h, delivers Wed morning, then ~45 mi to Joliet. Home long before Saturday, with hours left for a short Thursday/Friday load.
- 4 L1 $\$1,550 \div 540 = \mathbf{\$2.87}$ (above \$2.76) → BOOK after checks. L2 \$2.65 = break-even, and ends 180 mi from home → pass. L3 \$2.63 below break-even, slower-paying broker, but ends at home → only if L1 is gone; counter to ≥ \$1,525.
- 5 Check L&I: if a BMC-84 cancellation is pending, ask Harbor Point whether a replacement bond is filed. Don't send the packet until it is resolved; send it only through their setup platform.
- 6 "Mike: at \$6.70 diesel break-even is \$2.65, so I suggest a \$2.76 minimum. For Truck 12 I'm calling on Memphis → Chicago, \$1,550 (\$2.87), pickup Tue 10 AM CT, Carlos home Wed with hours to spare. Harbor Point shows a bond cancellation pending, so I'm holding the packet until they confirm a replacement. OK to book L1?"
